SUMMARY

Software Developer with hands-on experience in full-stack web development and RESTful API development using Angular, NestJS, PostgreSQL, and Docker. Experienced in backend services, database integration, authentication, automated data ingestion and synchronization, and troubleshooting full-stack systems. Also developed a machine learning-based Diabetes Prediction System as a Final Year Project, which received a Silver Award. Strong problem-solving skills with a focus on building reliable and scalable software solutions.

EXPERIENCES

RIAJATI SDN BHD

Junior Software Developer | 2024 – 2026

- Developed and maintained a full-stack API platform using Angular, NestJS, PostgreSQL, and Docker.
- Developed RESTful APIs and backend services using NestJS.
- Developed and integrated frontend features using Angular.
- Managed database structures and data operations using PostgreSQL.
- Implemented automated data ingestion and synchronization processes.
- Implemented authentication and API access control.
- Containerized application services using Docker for development and deployment.
- Participated in **User Acceptance Testing (UAT)** to validate system functionality, identify issues, and verify fixes against project requirements.
- Prepared and executed UAT test cases and documented testing results and issues.
- Participated in **Training of Trainers (ToT)** activities to support knowledge transfer and system training.
- Assisted in explaining system functionalities and workflows to trainers and relevant stakeholders.
- Troubleshoot and resolved frontend, backend, database, and API integration issues.

Achievements

- Contributed to the development and deployment of an API platform for a government-related system involving Jabatan Meteorologi Malaysia.
- Gained hands-on experience in UAT, system validation, issue tracking, and stakeholder collaboration.
- Participated in Training of Trainers activities to support successful system adoption and knowledge transfer.

EDUCATION

UNIVERSITI SULTAN ZAINAL ABIDIN

Bachelor of Computer Science (Software Development) with Honours | 2021 – 2024

CGPA: 3.33

MALACCA MATRICULATION COLLEGE

KPM Matriculation Programme (Computer Science) | 2019 - 2021

CGPA: 3.38

FINAL YEAR PROJECT

DIABETES PREDICTION SYSTEM

- Developed a web-based diabetes prediction system using Python and Django.
- Implemented a machine learning model to predict the likelihood of diabetes based on user-provided health attributes.
- Developed backend functionality for data processing, prediction, and result presentation.
- Designed and integrated the system database with the Django application.
- Applied data preprocessing and model evaluation techniques.

HONOR AWARDS

Dean’s List for 1st Year 1st Semester
Universiti Sultan Zainal Abidin

Silver Award Final Year Project (Research Category)
University Sultan Zainal Abidin

TECHNICAL SKILLS

- Programming Languages:** Python, JavaScript, TypeScript, SQL, Java
- Frontend Development:** Angular, HTML, CSS
- Backend Development:** NestJS, Django, RESTful API
- Database:** PostgreSQL
- DevOps & Tools:** Docker, Git, GitHub
- Machine Learning:** Data Preprocessing, Model Training, Model Evaluation
- Other:** API Integration, Authentication & Authorization, Database Management, Data Ingestion & Synchronization, Debugging & Troubleshooting

LANGUAGE

Malay (Native) | English (Intermediate)
